

IVY TECH COMMUNITY COLLEGE OF INDIANA BLOOMINGTON

HEALTH INFORMATION TECHNOLOGY

The Health Information Technology Associate of Science degree program will prepare students to work in the field of health information and medical record management. It is a program that prepares individuals to plan, design, and manage health record systems. HIT professionals assist in collecting, storing, securing, retrieving, analyzing and transmitting health information. This information is used by clinical professionals in health care organizations.

Health Information Technology includes instructions in the following areas:

- Health information systems
- Electronic health record technology and applications
- Principles of the biomedical sciences
- Coding classification and reimbursement systems
- Aspects of clinical research, statistics and methodologies
- Supervision and Organizational management
- Health records in the legal system
- Professional standards and ethics

Students will complete 69 credit hours at Ivy Tech Community College to receive their Associate of Science degree in Health Information Technology

Potential employers for those completing the Health Information Technology degree include hospitals, managed care organizations, long term care facilities, behavioral health facilities, information system vendors, ambulatory care facilities, rehabilitation centers, skilled nursing facilities, home care providers, government agencies, physician practices, clinics, and insurance companies.

Students accepted into the Health Information Technology program at Ivy Tech will complete 25 credits in general education and 44 credits of professional coursework for a total of 69 credit hours.

Additional program information sessions and selection criteria will be published at a later date. Students interested in more information about the program should contact kcraig@ivytech.edu or 812-330-6112.
