The Health Information Technology Associate of Science degree program will prepare students to work in the field of health information and medical record management. It is a program that prepares individuals to plan, design, and manage health record systems. HIT professionals assist in collecting, storing, securing, retrieving, analyzing and transmitting health information. This information is used by clinical professionals in health care organizations.

Health Information Technology includes instructions in the principles and basic content of the biomedical and clinical sciences; information technology and applications; data and database management; clinical research methodologies; health information resources and systems; office management; legal requirements; and professional standards.

Students will complete 64 credit hours at Ivy Tech Community College to receive their Associate of Science degree in Health Information Technology.

Potential employers for those completing the Health Information Technology degree include hospitals, managed care organizations, long term care facilities, behavioral health facilities, information system vendors, ambulatory care facilities, rehabilitation centers, skilled nursing facilities, home care providers, government agencies, physician practices, clinics, and insurance companies.

Students accepted into the Health Information Technology program at Ivy Tech will complete 19 credits in general education and 45 credits of professional coursework for a total of 64 credit hours.
