- 90% of graduates employed
- 84% employed in field of certificate or degree
- 97% employed in Indiana
- 94% employed in South Central Indiana
- 14% are attending another Indiana college or university

Vision: “A College for Our Communities”

Mission: Ivy Tech Bloomington will be transformed to a model comprehensive community college, creating and sustaining strategic partnerships that enable us to deliver quality education and training programs, builds a foundation that recognizes and values relationships, academic rigor, and curriculum relevance to student success, and change the lives of our students while supporting the workforce and economic development goals of our communities.

Ivy Tech Bloomington is a comprehensive community college that:
1) focuses on the success of the individual student.
2) responds to community workforce and economic development needs.
3) creates and enhances opportunities for “seamless education”.
4) models a “service-oriented” learning environment.
5) aligns its institutional capacity to support its transformation.
